

For adults with chronic Hep C genotypes 1-6

ASK YOUR DOCTOR IF

# EPCLUSA<sup>®</sup> IS YOUR KIND OF HEP C CURE

CHRIS, 39  
CURED WITH  
EPCLUSA

Cure means the Hep C virus is not detected in the blood when measured three months after treatment is completed.

Please see Important Facts about EPCLUSA including **Important Warning on hepatitis B reactivation** on page 6.

## EPCLUSA<sup>®</sup>

sofosbuvir/velpatasvir  
400 mg/100 mg tablets

*I was skeptical about Hep C treatment at first. But **EPCLUSA** cured me. If it worked for me, it could work for you too. — Chris*

## THERE'S NEVER BEEN A BETTER TIME TO ASK ABOUT A HEP C CURE

If left untreated, Hep C can cause liver damage. The sooner you start treatment, the more likely you are to avoid permanent damage to your liver.

Deciding to treat your Hep C is a step toward improving your health. Ask your doctor about EPCLUSA.

 **EPCLUSA**<sup>®</sup>  
sofosbuvir/velpatasvir  
400 mg/100 mg tablets

### What is EPCLUSA?

EPCLUSA is a prescription medicine used to treat adults with chronic (lasting a long time) hepatitis C (Hep C) genotype 1, 2, 3, 4, 5, or 6 infection with or without cirrhosis (compensated).

### What is the most important information I should know about EPCLUSA?

**EPCLUSA can cause serious side effects, including:**

- **Hepatitis B virus reactivation:** Before starting EPCLUSA treatment, your healthcare provider will do blood tests to check for hepatitis B infection. If you have ever had hepatitis B, the hepatitis B virus could become active again during and after treatment with EPCLUSA. This may cause serious liver problems including liver failure and death. If you are at risk, your healthcare provider will monitor you during and after taking EPCLUSA.

*“Taking one pill a day was easy. I just took it and got on with the rest of the day. — Chris”*

## WITH EPCLUSA, YOU CAN TREAT YOUR HEP C WITH CONFIDENCE

EPCLUSA has been extensively studied in patients with genotypes 1-6 without cirrhosis or with compensated cirrhosis.

- EPCLUSA has a 98% overall cure rate
- EPCLUSA can fit around your schedule: just one pill a day, with or without food
- EPCLUSA can work even if you have liver damage

Not actual size.

### What should I tell my healthcare provider before taking EPCLUSA?

- **Tell your healthcare provider about all of your medical conditions**, including if you have ever had hepatitis B infection or liver problems other than hepatitis C infection; if you have kidney problems or are on dialysis; if you have HIV; or if you are pregnant or breastfeeding, or plan to become pregnant or breastfeed. It is not known if EPCLUSA will harm your unborn baby or pass into your breast milk.
- **Tell your healthcare provider and pharmacist about all the medicines you take**, including prescription and over-the-counter medicines, vitamins, and herbal supplements. EPCLUSA and certain other medicines may affect each other, or may cause side effects.

## EPCLUSA MAY COST LESS THAN YOU THINK

EPCLUSA is covered by most insurance plans.

### What are the possible side effects of EPCLUSA?

Serious side effects may also include:

- **Slow heart rate (bradycardia):** EPCLUSA, when taken with amiodarone (Cordarone<sup>®</sup>, Nexterone<sup>®</sup>, Pacerone<sup>®</sup>), a medicine used to treat certain heart problems, may cause slow heart rate. In some cases slow heart rate has led to death or the need for a pacemaker when amiodarone is taken with medicines containing sofosbuvir. Get medical help right away if you take amiodarone with EPCLUSA and get any of the following symptoms: fainting or near-fainting, dizziness or lightheadedness, not feeling well, weakness, extreme tiredness, shortness of breath, chest pains, confusion, or memory problems.

The most common side effects of EPCLUSA include headache and tiredness. Tell your healthcare provider if you have any side effect that bothers you or does not go away.

**You are encouraged to report negative side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch) or call 1-800-FDA-1088.**

## IMPORTANT FACTS

This is only a brief summary of important information about EPCLUSA and does not replace talking to your healthcare provider about your condition and your treatment.

### MOST IMPORTANT INFORMATION ABOUT EPCLUSA

**EPCLUSA can cause serious side effects, including:**

**Hepatitis B virus reactivation:** Before starting treatment with EPCLUSA, your healthcare provider will do blood tests to check for hepatitis B infection. If you have ever had hepatitis B, the hepatitis B virus could become active again during or after treatment with EPCLUSA. This may cause serious liver problems including liver failure and death. Your healthcare provider will monitor you if you are at risk for hepatitis B reactivation during and after you stop taking EPCLUSA.

### ABOUT EPCLUSA

EPCLUSA is a prescription medicine used to treat adults and children 6 years of age and older or weighing at least 37 lbs (17 kg) with chronic (lasting a long time) hepatitis C virus (HCV) genotype 1, 2, 3, 4, 5, or 6 infection with or without cirrhosis (compensated). In those with advanced cirrhosis (decompensated), EPCLUSA is used with ribavirin.

### POSSIBLE SIDE EFFECTS OF EPCLUSA

**EPCLUSA can cause serious side effects, including:**

- **Those in the “Most Important Information about EPCLUSA” section.**
- **Slow heart rate (bradycardia):** EPCLUSA, when taken with amiodarone (Cordarone®, Nexterone®, Pacerone®), a medicine used to treat certain heart problems, may cause slow heart rate, which in some cases has led to death or the need for pacemaker when amiodarone is taken with medicines containing sofosbuvir. Get medical help right away if you take amiodarone with EPCLUSA and get any of the following symptoms:
  - fainting or near-fainting
  - extreme tiredness
  - dizziness or lightheadedness
  - shortness of breath
  - not feeling well
  - chest pains
  - weakness
  - confusion
  - memory problems

**The most common side effects of EPCLUSA include** headache and tiredness. Tell your healthcare provider if you have any side effect that bothers you or that does not go away.

These are not all the possible side effects of EPCLUSA. For more information, ask your healthcare provider or pharmacist. You may report side effects to FDA at 1-800-FDA-1088.

### BEFORE TAKING EPCLUSA

**Tell your healthcare provider about all of your medical conditions, including if you:**

- have ever had hepatitis B virus infection
- have liver problems other than hepatitis C infection
- have kidney problems or you are on dialysis
- have HIV-1 infection
- are pregnant or breastfeeding, or plan to become pregnant or breastfeed
  - If you take EPCLUSA with ribavirin, you should also read the ribavirin Medication Guide for important pregnancy-related information.

**Tell your healthcare provider about all the medicines you take:**

- Keep a list that includes all prescription and over-the-counter medicines, vitamins, and herbal supplements, and show it to your healthcare provider.
- EPCLUSA and certain medicines may affect each other, or cause side effects.
